Summary

Computer Science undergraduate with hands-on experience in full-stack web development and software engineering. Skilled in C++, JavaScript, React.js, Node.js, PostgreSQL, with experience building scalable REST APIs and database-driven applications. Strong foundation in Data Structures, Algorithms, OOPS, and DBMS, with a focus on problem-solving and building efficient software solutions.

Education

ABES Engineering College **2023 – 2027**
Department of Computer Science — 8.228 *Expected July 2027* | *Ghaziabad, India*

Technical Skills

Languages: C++, JavaScript, SQL
Framework & Libraries: ReactJS, Node.js, Express.js, HTML5, Tailwind CSS
Security & Authentication: Application Security & Auth
Databases & ORM: PostgreSQL, MongoDB, Prisma ORM
Tools & Infrastructure: Git, GitHub, Docker, Postman, Vercel, Supabase

Experience

Jaypee Brothers Medical Publishers Pvt. Ltd. **Aug 2026 – Present**
Software Engineer Intern

Contributing to the development and maintenance of digital solutions for medical publishing, including e-book platforms, medical ed-tech, and web applications for content management and delivery.

The Developers Arena **June 2025 - Dec 2025**
Data Science Intern

Cleaned and standardized 6,400+ sales records across 45 stores, performed exploratory and statistical analysis, and evaluated machine learning models, identifying Random Forest as the strongest predictor with 95.3accuracy.

Projects

Medora | *React 19, Node.js, Express 5, PostgreSQL, Prisma ORM, JWT, Docker* **May 2026**

- Optimized appointment bookings from a manual workflow to a **3-step digital flow**, **reducing coordination overhead by 40%** and eliminating scheduling calls entirely.
- Shipped 12+ protected REST endpoints across 2 role-based dashboards, enforcing JWT authorization at route level with role segregation across protected resources.
- Eliminated double-booking under concurrent multi-user requests via atomic transactions; appointment status updates propagate in real time across both dashboards with zero manual coordination.

UPIQ | *React, RESTful APIs, Docker* **Dec 2025**

- Developed responsive and reusable ReactJS components for transaction management dashboards, authentication workflows, and expense tracking interfaces.
- Integrated frontend interfaces with Spring Boot REST APIs to enable real-time transaction management and a seamless user experience.
- Designed intuitive dashboards with efficient state management, client-side routing, and form validation to enhance usability and deliver a smooth user experience.

Certifications & Achievements

- Basics of Machine Learning with Python – iHUB IIT Roorkee *Oct 2024*
- Solved 450+ DSA problems across LeetCode and CodeChef.
